

MAGIC BUTTONS GOES TO NORWAY.

Hello everyone,

I am Magic Buttons. Most of you have met me on Gwyneth's Level 2 Trainings and at her special EFT events. Recently I was invited along with my Mummy, Linda Wood, to travel to Norway where we taught a three day workshop on the many different ways of using me in your EFT therapy work. I can help just as much with adults as with kids.

The people of Norway touched our hearts and we touched theirs and they all tapped on my magical heart buttons. In fact, Mummy said she'd never seen so many people hitting core issues while borrowing benefits than she did during those three days. She thinks it was because they are thinking they're 'safe' when they tap on me while watching Mummy work on someone else. That's when I get right in there and pull up their issues... while they are distracted.

Mummy was so excited because the people of Norway were able to let this workshop open their own creative minds. She said they will go on to do some wonderful things for many people that we might not have been able to reach otherwise.

Our EFT film producer from the states, Karin Davidson and her husband, Scott also came along to Norway. The Norwegians loved them too and wouldn't let any of us leave until we'd booked another time to come back.

And within a few months time, Karin will have DVDs of this wonderful event edited and for sale. Then even more people can be reached and learn how to tap with me.

Mummy and Karin were so excited because there was a doctor (a GP) in the group, several nurses and some teachers. Think of the people they can reach! They have already been doing some very powerful work with EFT. Since we've gotten back home, the Doctor has emailed to tell us how much more effective his work is now that he is working with my magical abilities. Mummy said she'd like to be a little mouse in the corner of his office as he brings me out to work with the elderly AND with kids! It makes me and my Mummy and Karin want to cry to even think about the people he has the power to touch because of his position and credibility. And he is so happy to have these wonderful tools of EFT and me, with my Magic Buttons, to help him in his work. Our Doctor friend not only helps his patients, but he also took me home and immediately helped his own children and spouse with the most amazingly creative work.

Now they love me too!

If you'd like to learn more about how to work with me and specialize in this important area of helping parents, children and anyone who wishes to be all they can be, please check out my Mummy's website for Workshop dates or contact my Mummy directly. www.magicaltappingbear.com/workshops
Bye, bye everyone. I can't wait to see you again.
